Re: Ex Parte Presentation
CC Docket No. 97-213

Dear Ms. Salas:

On June 21, 2001 Chip Sharp of Cisco Systems, Inc. and Scott Harris and the undersigned of Harris, Wiltshire & Grannis, LLP met with Rodney Small, Charles Iseman, Shanti Gupta and Jerry Stanshine of the Office of Engineering and Technology and Susan Kimmel and John Spencer of the Wireless Bureau to discuss the tremendous progress that Cisco has made to develop technology that will enable its carrier customers to comply fully with lawful intercept requests for voice communications carried over IP wireline networks (one type of packet-mode network covered by CALEA). More specifically, Cisco discussed its ongoing technical efforts to develop equipment capable of segregating call-identifying information from call content and delivering to law enforcement only that information which is specifically requested pursuant to a court order or other lawful authorization. Cisco also made it clear that carriers will not be able to deploy these technical solutions by the current September 30, 2001 deadline.

Pursuant to Section 1.1206 of the Commission's rules, an original and one copy of this letter are being filed. If you have any questions or require any additional information, please do not hesitate to contact me at (202) 730-1331.

Respectfully submitted,

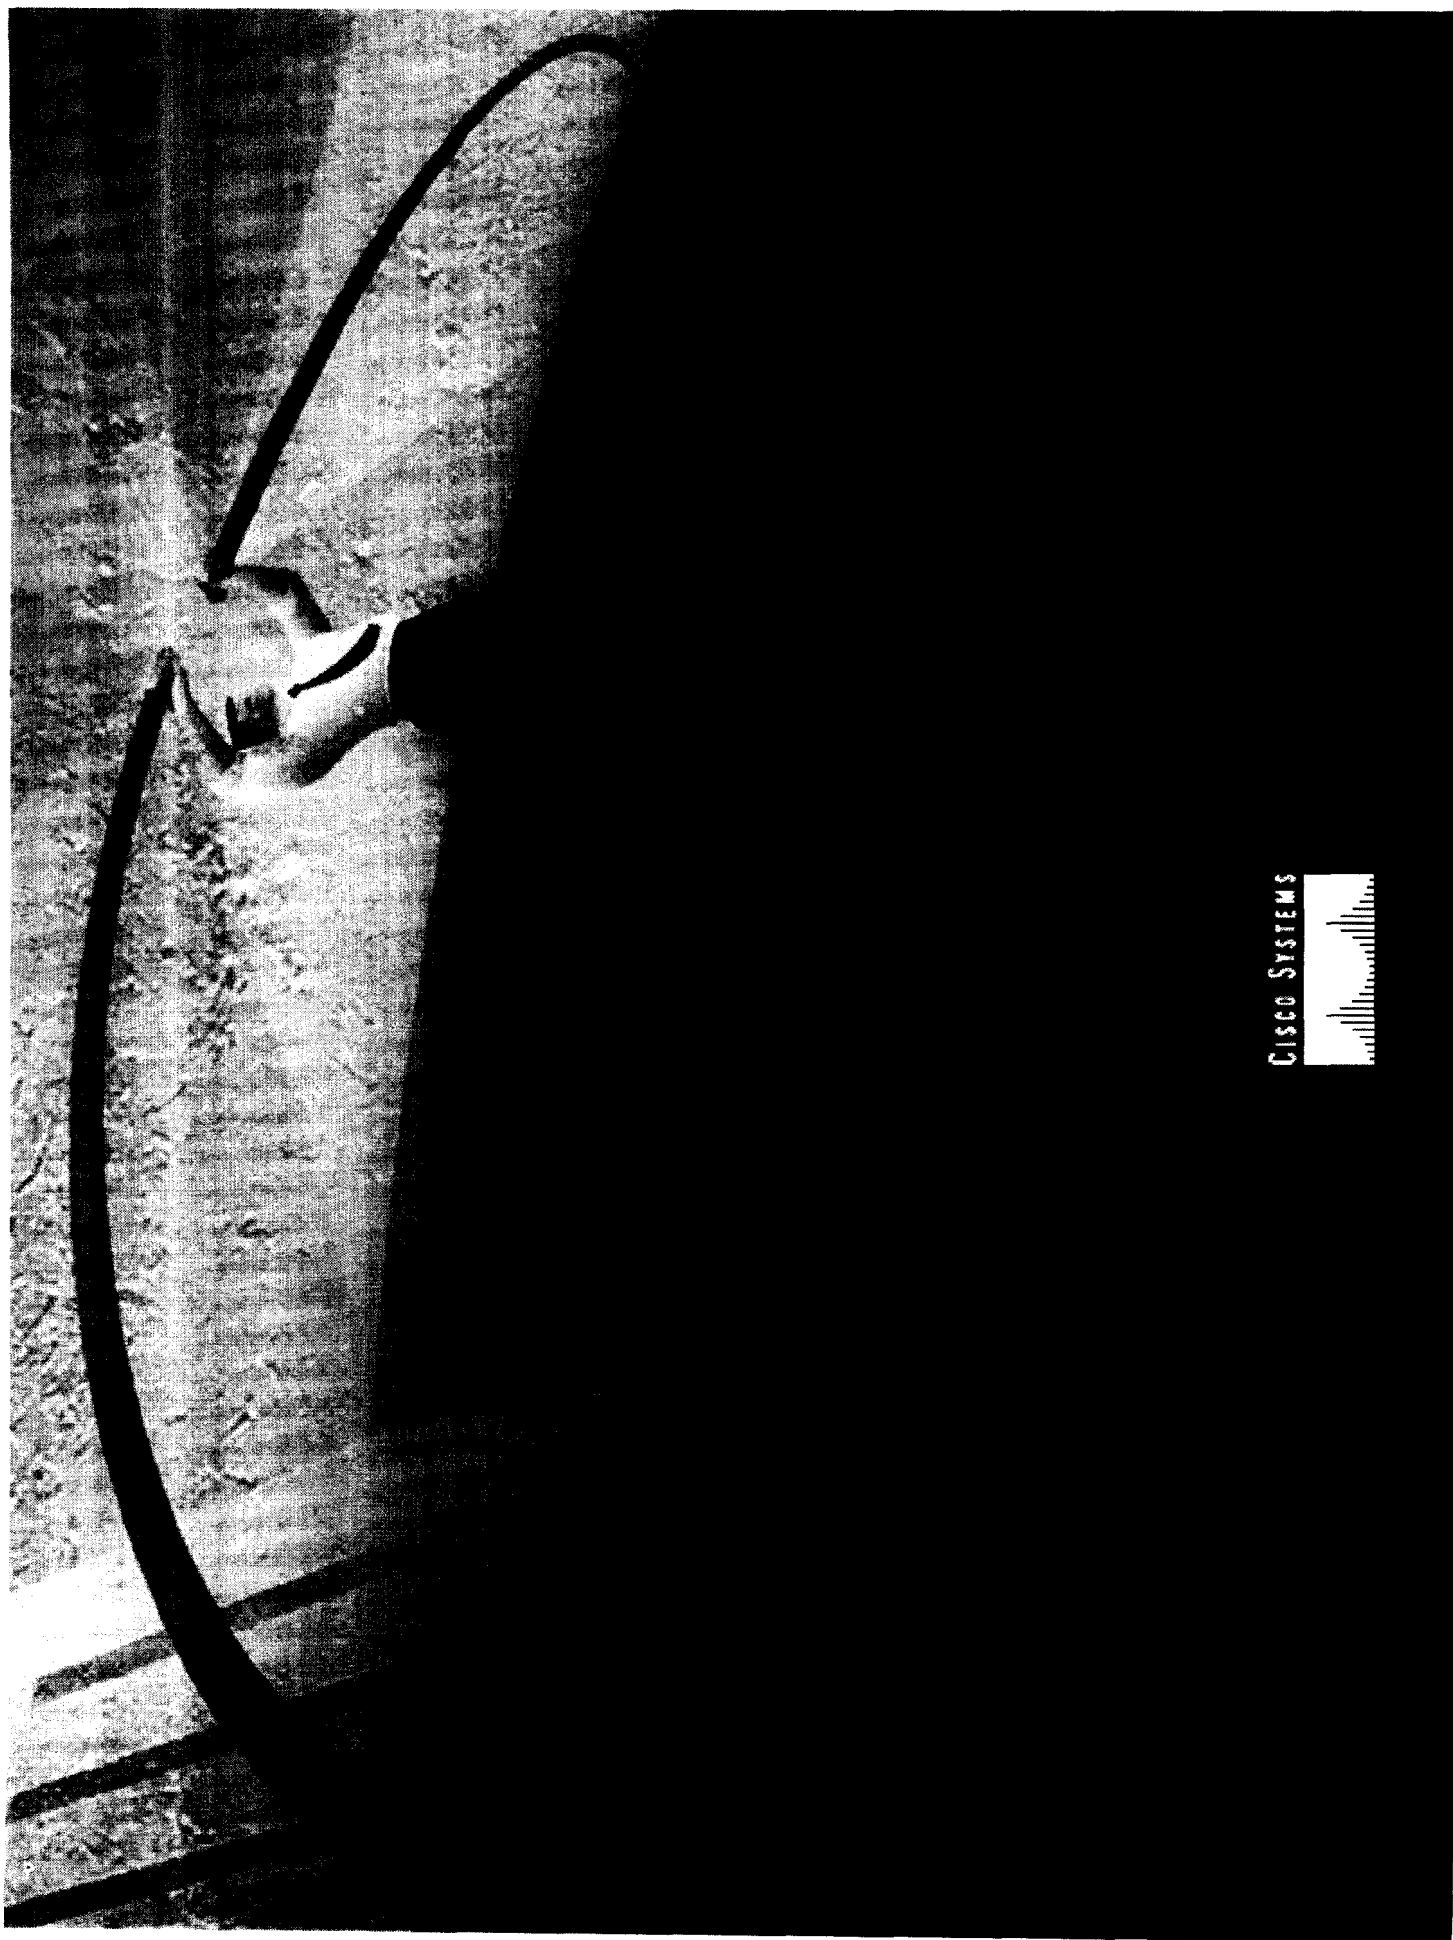

Kelly S. McGinn
Counsel to Cisco Systems, Inc.
